

Topic for the next transnational visit to Germany: “Local economy in Europe”

For the next transnational visit, you will have to answer the following questions:

1. What are the main three industry sectors of your country?
2. What are the three most important companies in your region? Give the names of the companies and their location.
3. Which industry sector do they belong to? (*Household appliances, IT products, food, furniture, clothing, etc.*)
4. Where and when did these companies start up? Who owns these companies now?
5. What is these companies’ annual turnover?
6. Do the companies export to other countries? If so, which ones? How much (percentage) of their total sales are exported?
7. How many employees do they have?
8. Do they offer any type of apprenticeship? If so, which ones? How many apprentices do they have in total?
9. How many factories/subsidiaries do the companies have in your country?
10. Do the companies have any factories or subsidiaries in other countries, especially in France, Norway, Turkey or Germany?
11. One additional question to be chosen by each country.

Please collect all necessary information regarding these questions. Please add some pictures of the companies and its products or services. Results are to be brought to Germany – students will then work in international teams on the products and will present their results.
